

Gold Balance

Application:

- Laboratories
- R & D
- Precise Parts Counting
- Gold
- GSM calculation

- Precise and Excellent for Utmost Efficiency
- Ideal for Laboratory and Production Environment
- Glass Draft Shield for stable reading

Overview:

GB series Gold balance having high Accuracy & Bright Green LED display with multiple units for weighing purpose. Using a single key the units can be selected. Special designed draft shield protects from wind and outdoors disturbances to get high stability. The feature of parts counting and percentage weighing make the balance worth value.

Salient Features:

- With thermal hardware compensation for best weighing performance
- Draft Shield to reduce errors due to air movement
- Multiple weighing units & precise counting function.
- Full Tare Range, auto calibration & auto Zero mode
- Inbuilt rechargeable battery gives 24 hours backup.
- Overload protection system available
- Various weighing units
- Anti-vibration mode

Technical Specification:

- Display type: Bright Green LED display
- Power Source: AC 230V + DC 6V/4AH Rechargeable battery
- Dimension: 251 x 232 x 189 mm

Optional Accessories:

- Remote Display (suitable for desktop mounting)
- RS232C interface
- Printer Interface
- Date & Time facility with GLP/GMP compliance
- Direct printing option, continuous or command control

GT Series Specification:

Model	Capacity	Accuracy	Pan Size
GA 100	100 g	1 mg	70 mm
GB 300	300 g	10 mg	120 mm
GB 600	600 g	10 mg	120 mm
GB 1000	1000 g	10 mg	120 mm
